

100 DESIGNS FROM STOCK WITH KUADRA

Novellini Europe's leading manufacturer of shower enclosures and wet rooms and steam cabins has unveiled its full line-up of one hundred different enclosure design formats for the new Kuadra collection.

All available from UK stock holding, all totally environmentally friendly and all, fully supported technically before, during and after sale.

The Kuadra collection comprises a comprehensive range of glass panels and doors all of which are produced from Novellini's own factory that strives to produce no CO2 emissions. Using tempered 8mm safety glass that is treated with Crystal Clear® which makes

the glass easy and quick to clean, resistant to bacteria and lime scale deposits. Kuadra enclosures are suitable for use as a level access for a wet room or with a shower tray. **Pictured:** Kuadra with NewChrome® profiles and Novellini Olympic shower tray in black.

UV Bonded hinges, where required by the design, are standard. All chrome in the collection is Novellini's NewChrome® which is ecologically produced using a zero-emissions integrated cycle and also resistant to bacteria and lime scale spotting, meaning it remains super shiny.

Flavio Bucciatti, Managing Director for Novellini UK Ltd "With over 100 designs held in stock here in the UK anything is possible, quickly, smoothly and always complete. We also support our products for years to come which takes further weight from customers minds."
